

Dosimetry 2019 activities

A member of the EANM Dosimetry Committee will be participating at the IAEA “International Symposium on Standards, Applications and Quality Assurance in Medical Radiation Dosimetry” (IDOS) conference June 18-21, 2019. We will also be involved in the European School for Medical Physics Experts (ESMP) Practical course on Nuclear Medicine Dosimetry, January 24-26 January 2019 in Prague, Czech Republic. In addition to organising the scientific sessions of the DoMoRe track of the EANM annual congress we are also involved in organising 10 additional symposia at the congress in Barcelona. After the success of the ESMIT level 3 school on clinical dosimetry implementation we are looking to develop online teaching material – in the form of webinars as preparatory material before repeating the course in 2020.
